### Description:

HIV1 performs highly complex orchestrated tasks during the assembly, budding, maturation and infection stages of the viral replication cycle. During viral assembly, the proteins form membrane associations and self-associations that ultimately result in budding of an immature virion from the infected cell. Gag precursors also function during viral assembly to selectively bind and package two plus strands of genomic RNA. Capsid protein p24 probably forms the conical core of the virus that encapsulates the genomic RNA-nucleocapsid complex.

**Uniprot:** P04587

### Alternative Names:

CA antibody; Capsid protein p24 antibody; HIV-1 Gag p24 antibody; HIV1gp1 antibody; Human immunodeficiency virus 1 antibody; Human immunodeficiency virus type 1 p24 antibody;

**Specificity:** Human Immunodeficiency Virus Type 1(HIV 1) p24 protein.

**Reactivity:** Species independent

**Source:** Mouse

**Mol.Wt.:** 24 kDa

**Storage Condition:** Store at -20 °C. Stable for 12 months from date of receipt.

**Application:** WB 1:1000-1:2000; IHC/IF 1:100-1:1000
