Description:

C3 plays a central role in the activation of the complement system. Its processing by C3 convertase is the central reaction in both classical and alternative complement pathways. After activation C3b can bind covalently, via its reactive thioester, to cell surface carbohydrates or immune aggregates.Derived from proteolytic degradation of complement C3, C3a anaphylatoxin is a mediator of local inflammatory process. In chronic inflammation, acts as a chemoattractant for neutrophils (By similarity). It induces the contraction of smooth muscle, increases vascular permeability and causes histamine release from mast cells and basophilic leukocytes.Acts as a chemoattractant for neutrophils (TG) synthesis and glucose transport in adipocytes, regulating fat storage and playing a role in postprandial TG clearance. Appears to stimulate TG synthesis via activation of the PLC, MAPK and AKT signaling pathways. Ligand for C5AR2. Promotes the phosphorylation, ARRB2-mediated internalization and recycling of C5AR2.

Uniprot: P01024

Alternative Names:

acylation-stimulating protein cleavage product; AHUS5; ARMD9; ASP; C3 and PZP-like alpha-2-macroglobulin domain-containing protein 1; C3; c3 complement; C3a anaphylatoxin; C3a; C3b; CO3_HUMAN; Complement C3; Complement C3c alpha' chain fragment 2; Complement C3c; Complement component 3; Complement component C3; Complement C3; Complement c3; Complement C3; Complement C3; CPAMD1; Prepro C3;

Specificity: C3 Antibody detects endogenous levels of total C3 and C3 alpha chain.

Reactivity: Human, Mouse, Rat, Monkey

Source: Mouse

Mol.Wt.: 187 kDa(total), 110 kDa(alpha chain)

Storage Condition: Store at -20 °C. Stable for 12 months from date of receipt.
