□ 500 µl

Background:

Immunoglobulin G (IgG), is one of the most abundant proteins in serum with normal levels between 8–17 mg/mL in adult blood. IgG is important for our defence against microorganisms and the molecules are produced by B lymphocytes as a part of our adaptive immune response. The IgG molecule has two separate functions; to bind to the pathogen that elicited the response and to recruit other cells and molecules to destroy the antigen. The variability of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is estimated to be 1011 variants.

Application:

IEM 1:20-1:200
IGS 1:20-1:200
GICA 1:20-1:200

Companion Products:

M210011 Goat Anti-Mouse IgG AF 488
M210012 Goat Anti-Rabbit IgG AF 488
M210013 Goat Anti-Mouse IgG AF 594
M210014 Goat Anti-Rabbit IgG AF 594

Storage:

Shipped at 4°C, Store at -20°C (Avoid repeated freeze/thaw cycles).

Concentration:

0.4mg/1ml
