Background:

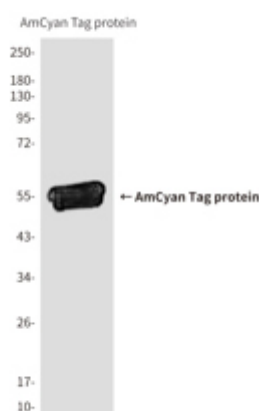

AmCyan has been adapted from the corresponding full length cDNA for higher solubility, brighter emission, and rapid chromophore maturation. AmCyan1 has been human-codon optimized for enhanced translation in mammalian cells. AmCyan is a very good blue fluorescent reporter protein, and useful in two-color analyses with DsRed2, DsRed-Express, or AsRed2, and in three-color analyses with ZsYellow and HcRed.

Alternative Names : AmCyan

Source : Mouse

Application

WB

Western blot analysis of recombinant AmCyan protein, diluted at 1:5000.

Clonality : Monoclonal Antibody

Isotype : IgG1

Immunogen : Recombinant Protein of AmCyan

Reactivity : Transfected

Dilution : WB: 1/1000-1/10000

Molecular Weight : Refer to figures

Purification : Affinity Purified

Form : Liquid

Concentration : 1 mg/ml

Buffer:

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide, pH 7.3.

Storage:

Store at 4°C short term. Store at -20°C long term. Avoid freeze/thaw cycles.
