Source : Mouse**Clonality :** Monoclonal Antibody**Purification :** Protein G affinity purified**Formulation :** Liquid**Reactivity :** ALL**Application :** ELISA**Dilution :** 1:5000-1:20000**Storage:**

Shipped at 4°C. Store at -80°C~-20°C for two year. Avoid freeze/thaw cycles.

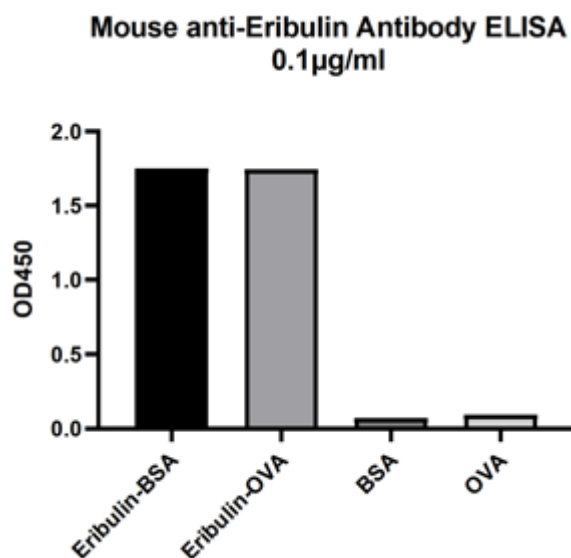

Buffer : PBS,PH7.4**Immunogen :** Eribulin conjugated with BSA**Concentration :** 1 mg/ml**Conjugation :** Unconjugated**Isotype :** IgG1, κ**Clone :** MM461B**Images:**

Fig1: ELISA Binding Assay of Anti-Eribulin Antibody to different proteins. ELISA analysis of Anti-Eribulin Monoclonal Antibody with Eribulin-BSA, Eribulin-OVA , BAS and OVA. Anti-Eribulin Monoclonal Antibody can bind to Eribulin-BSA or Eribulin-OVA but not carrier proteins.

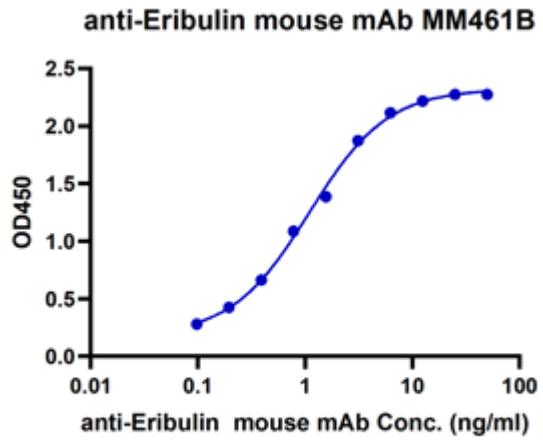

Fig2: ELISA Binding Assay of Anti-Eribulin Antibody .Immobilized Eribulin ADC at $2\mu\text{g/mL}$ ($100\mu\text{L/well}$) can bind anti-Eribulin mouse monoclonal antibody .
