100µl;200µl;1ml

Description:

The V5 epitope tag is derived from a small epitope (Pk) present on the P and V proteins of the paramyxovirus of simian virus 5 (SV5). The V5 tag is usually used with all 14 amino acids (GKPIPPLLGLDST), although it has also been used with a shorter 9 amino acid sequence (IPNPLLGLD). V5 tag antibodies provide a dependable method for the detection and purification of tagged target proteins without a protein-specific antibody or probe. Invitrogen V5 tag antibodies are designed to reliably detect recombinant V5-tagged proteins.

Molecular Wt. : 57 kDa

Antibody type : Mouse monoclonal Antibody

Isotype : Mouse IgG1

Storage buffer:

1*PBS (pH7.4), 0.2% BSA, 50% Glycerol. Preservative: 0.05% Sodium Azide.

Form : Liquid

Concentration : 2 mg/mL.

Purity : Protein G affinity purified.

Alternative names:

GKPIPPLLGLDST epitope tag antibody

GKPIPPLLGLDST tag antibody

Protein Rev antibody

Regulator of expression of viral proteins antibody

rev antibody

V5 epitope tag antibody

Positive control : Recombinant protein.

Recommended dilutions : WB: 1:10,000;ELISA: 1:20,000-1:50,000

Storage:

Store at +4°C after thawing. For long-term storage, please store it at -20°C. Avoid repeated freeze / thaw cycles.
